(54) Title: COVER FOR AN OBJECT USING SOLAR RADIATION

(57) Abstract: The invention relates to a cover for an object using solar radiation, wherein the cover comprises a cover sheet (1) made of a material (2) transparent to solar radiation, wherein, viewed in cross-sectional view with respect to the sheet (1), the sheet has a zig-zag profiled surface structure (3, 4) on either side; the invention also comprises a combination of two covers, wherein the cover plates of each of the covers are above one another, in particular run parallel to one another. Moreover, the invention comprises a combination comprising a cover and an object, wherein the cover covers the object and wherein the object uses, in particular absorbs, and converts solar radiation.
